

Italian custom deck — Quick-Start Guide

Order #SAMPLE · 40 words · 80 cards · built by Quietforge

What you received

- **Italian-Custom-Deck-SAMPLE.apkg** — the Anki deck. Every word makes two cards: Recognition (Italian → English) and Production (English → Italian). Theme and part-of-speech tags are on every note.
- **Italian-Custom-Deck-SAMPLE-Word-List-A4.pdf** and **-Letter.pdf** — the same entries as a printable list, grouped by theme. Print whichever paper size you use.
- **Italian-Custom-Deck-SAMPLE.csv** — every field in a spreadsheet (UTF-8; Excel, Numbers, Google Sheets). Use it to build your own cards or a Quizlet set.
- **Italian-Custom-Deck-SAMPLE-anki-import.txt** — plain tab-separated text for Anki's own import, if you prefer your own note type.
- **README.txt** — file list and licence.

Install the deck

- 1 Get Anki. Desktop (Windows, macOS, Linux): free from **apps.ankiweb.net**. Android: **AnkiDroid**, free. iPhone/iPad: **AnkiMobile** is a paid app made by Anki's developers — or make a free AnkiWeb account and review in the browser at ankiweb.net.
- 2 Desktop: **File → Import** → choose **Italian-Custom-Deck-SAMPLE.apkg**. AnkiDroid: open the .apkg from your Downloads and pick AnkiDroid, or use the menu → Import.
- 3 The deck appears as "Italian — Custom Deck (Quietforge #SAMPLE)". Click it → **Study Now**.
- 4 Anki shows 20 new cards a day by default, which is 10 new words in both directions. Change it in the deck's options gear → Daily limits.
- 5 To study on more than one device, make a free AnkiWeb account and press Sync on each.

How the cards work

A Recognition card shows the Italian word with its part of speech (and gender, where the language has one). The back gives the English meaning, an original example sentence with its translation, and, on most cards, a short note (plural, irregular forms, aspect partner, separable prefix, register). Production cards flip it: you see the English and must produce the Italian. If you only want one direction, open **Browse**, select the deck, choose the card type you don't want and **Cards → Toggle Suspend**.

Study one theme at a time

Every note is tagged **itcustom::<theme>** and **pos::<part of speech>**. Use **Tools → Create Filtered Deck** with a search like **tag:itcustom::verbs1 is:new** to learn one theme first, or **tag:pos::verb** to drill the verbs.

Verbs1	tag:itcustom::verbs1	5
Home	tag:itcustom::home	5
Food	tag:itcustom::food	5
City	tag:itcustom::city	5
Travel	tag:itcustom::travel	5
Shopping	tag:itcustom::shopping	5
Work	tag:itcustom::work	5
Health	tag:itcustom::health	5

Getting it right

- Do the reviews Anki gives you each day before adding new words. Consistency beats volume.
- Say the word out loud on Production cards, then grade yourself honestly.
- Read the example sentence every time — the sentence carries the grammar a bare word list cannot.
- Found a card you disagree with? Reply to the delivery email with the card ID (it is in the CSV and on the back of each card) within 7 days and you get one free revision round — corrected cards and a rebuilt deck, no charge.

About this deck

Made by Quietforge, an AI-run studio. The example sentences, translations and notes were written with AI language models against a fixed spec, then checked by automated tests (schema, duplicate words and sentences, alphabet and diacritics, headword present in its own sentence) and two independent proofreading passes before delivery. Everyday register unless you asked for something else.

Licence: personal use by the buyer. Please do not resell the deck, share the files, or upload them to public deck sites. Anki is a trademark of its developers; Quietforge is not affiliated with or endorsed by them. Questions: quietforgestudio@agentmail.to
